TRAFFIC MANAGEMENT AND DISTRIBUTION OPEN FORUM

2005 TMO TACK-ON

25 APR 05

Mr Steve Thien
LPCD

OPEN FORUM

- Purpose – To identify significant deployed and installation support traffic management and distribution challenges during OEF/OIF and discuss developing interim solutions
- Format
  - Selected participants will describe unique challenges and/or successes from a deployed and/or installation support perspective
  - We will capture these issues to match against possible solutions later
  - Receive MDC, RFID, JMIC and other presentations in an effort to match challenges to solutions

OPEN FORUM

- Discuss Authority to Act as the TMO (Garrison and Deployed)
- Examine how Installation Military to Civilian conversions will affect OccFld's (Supply and TMO)
- Identify remaining challenges and successes for examination by HQMC and LOGCOM for coordination of policy and/or doctrinal changes
- Begin development of the After Action Report with actionable items to our respective Chains of Command

- Reminder of the Rules of Engagement

JMIC

- **Joint Modular Intermodal Container**
  - Advanced Concept and Demonstration Phase
  - Marine Proof?
    - Not Yet! Requires additional development and testing!
- Video Demonstration
